Mr. Matt Amedeo
Energy Solutions Representative
Environmental Systems Corporation
18 Jansen Court, West Hartford, CT 06110

Dear Matt,

I am very pleased to say that we are very satisfied with the high efficiency lighting project at the Main Library and the Barney Library that Environmental Systems Corporation coordinated this fall. From the outset, the information we received showing the energy savings that we would realize by retrofitting the lighting at both locations, including the annual savings in electrical costs, as well as the annual maintenance savings, was clear and compelling. I know I speak for our entire Board of Trustees, as well as our Capital Planning Committee, in thanking you and your team for all of your efforts to make this retrofitting project as seamless as possible. We are also happy to know that this project will help the environment and make the Libraries as energy-efficient as they have ever been. In short, from start to finish, the work ESC did in developing and implementing this project was outstanding. I would highly recommend ESC to any business or non-profit seeking to realize significant energy savings at their facility or facilities, knowing that they will recoup their initial investment within a reasonable amount of time and that there will be a significant positive impact on the environment.

Please feel free to refer any potential customers to me at 860-673-6791 x5213 if I can be of any assistance in talking about our experience working with you and your team.

Best regards,

Christopher J. Lindquist
