

I would like to offer this letter of recommendation for Environmental Systems Corporation (ESC) of West Hartford, CT for the comprehensive energy project that they designed and implemented for West Hartford Stairs and Cabinets. With ESC's help, we were able to complete a comprehensive energy conservation project which included a significant incentive from Eversource. The incentive enabled us to save money on the project and avoid a large amount of capital expenditure as well. We were also able to save over \$9,976 in annual energy costs. The project consisted of a large interior and exterior LED lighting installation.

The overall installation was smooth and seamless. The installers were neat, clean, organized and extremely helpful with anything we needed. Matt Amedeo, Energy Solutions Representative and Jamie Sykora, Project Manager kept me updated regularly as the project progressed and the installation went smoothly.

I highly recommend Matt Amedeo and the folks at ESC if you are considering an energy conservation project. They took care of everything from start to finish; from proposal to incentives, installation and clean-up. I would like to thank ESC for making this project easy for us with no hassle and the huge added benefit of new energy saving efficient equipment.

Sincerely,
